Despite the economic crisis which is still affecting heavily our country, and despite the fall in the household saving rate, net flows into funds and mandates are rebounding. Why?

- **Some tentative explanations that can be drawn looking at the general features of the market (1), savers (2 & 3), distributors (banks, 4 & 5) and management companies (6).**

1. A pro-cyclical market

3. Bank deposits pay low interests

4. Banks are becoming less dependent on funding from retail
